

SFI PRESS RELEASE

April 21, 2010 - SFI issues the following press release. Please review this carefully:

1. Impact Racing has withdrawn its appeal of the decertifications of its products bearing SFI 3.2A, 3.3, 16.1, and 16.5 specifications manufactured in the years 2005, 2006, 2007, and 2008. The decertifications of these products are now permanent.

2. The decertifications are based upon a number of the affected products being non-compliant with SFI specifications concerning labeling and construction. In addition to the presence of non-compliant SFI tags and the absence of DOMs on products, 3.2A/5 suits made prior to 2009 have been constructed with non-compliant materials that, in SFI's judgment, pose a safety risk to users of these suits.

3. Impact Racing is permitted to maintain the certification for products bearing SFI 3.2A, 3.3, 16.1, and 16.5 specifications manufactured in 2009 and 2010. SFI's investigation of the labeling and construction of these products is ongoing. Impact's participation in the SFI specification programs ends June 22, 2010.

4. Any Impact product with SFI specifications 3.2A, 3.3, 16.1, and 16.5 without a date of manufacture (DOM) is deemed to be a decertified product unless the manufacturer has provided the product user with proof that it was manufactured in 2009 or 2010. This proof must be presented to track officials upon request. Impact believes that its products made in 2009 and 2010 have the DOMs affixed to products to the extent mandated by SFI specifications.
