SFI SPECIFICATIONS

SFI maintains a quality assurance program for a wide variety of automotive aftermarket and motorsports performance products. Some of these products have a defined service life or recertification period. The following list shows all SFI Specifications with their respective recertification periods. An item with a recertification period must be sent back to the original manufacturer at the end of this time frame for inspection. Recertification is at the discretion of the manufacturer. Please note that the recertification period is NOT the same as the retest period for manufacturers, which is a separate requirement that may be found in Section 9.0 of each individual specification document. **Updated: June 16, 2026**
